ICE – 4
Topic: Getting familiar with Chat GPT.

Answer the following questions to the best of your understanding. Please use a step-by-step approach. Highlight the use of Chat GPT in your solution. Simple paragraphs will not suffice and not be graded.

Please include screenshots of Chat GPT to support and elaborate your answer.

1. Give an example of how GPT can be integrated with big data to enhance decision making processes?
2. Provide an example of how GPT can be used to extract insights and make predictions from big data sets in real-time?
3. Explain how GPT can be used to process and analyze large amounts of text data in a big data environment?
4. Discuss the impact that integrating GPT with big data technologies has on the scalability and speed of data processing?
5. Create a concept paper about big data and data science using Chat GPT.

ICE Submission Guidelines

1. ICE Submission is individual.

3. The documentation should include screenshots of your results and the associated explanation.

4. Provide the step by step explanation of each question of the exercise as per your understanding.

5. The similarity score for your document should be less than 15%.

6. Submit the Document in PDF format. The Document should contain your step by step approach to each question. Just a simple screenshot of a Chat GPT page will give you a 0.

7. Submission after the deadline is considered as late submission.
